The VCE5522C dust extractor impress with their high performance, which is based on an optimal combination of maximum depression and the highest air flow volume. They have a wide range of applications in the construction industry and are suitable for milling and grinding machines, floor saws as well as shot

blasters. The cleaning of the filter cartridges is done automatically by compressed air pulses. The VCE5522C consists of the power unit, which is compatible with a filter unit in two versions – the Longopac system VCE5522C LP and the container version VCE5522C CT, which consists of a removable

wheelbarrow with folding handles. This is easily unclipped and released using 4 levers. Both versions can be ordered with or without a HEPA filter.
