Maximum aggressiveness.
Maximum material removal.

The new **CERABOND X CA-P95 fibre** disc delivers **outstanding aggressiveness and an extremely high material removal rate** for demanding grinding applications on **steel and non-ferrous metals.**

Its geometrically shaped ceramic abrasive grain enables **fast material removal, consistently high performance and a long lifetime** thanks to its controlled self-sharpening effect. The robust fibre backing ensures high stability and safety - even under high grinding pressure.

It is particularly effective for removing surface defects, levelling weld seams and demanding grinding applications on unalloyed steels.

★★★ PREMIUM

CERABOND X CA-P95 fibre discs for steel and nonferrous metals

Key benefits

+ Maximum material removal
+ Increased productivity
+ Consistently high performance

Best results on powerful angle grinders with medium to high grinding pressure.
